

Why is Social Security Making Me Fill Out this Form Again?

A common question we hear from our clients is "Why is Social Security making me fill out this form again?" When claimants fill out the initial application, it can be very extensive and time consuming to complete. The application asks about work history, medical history, what doctors you have visited, and all your prescriptions. Filling this out one time feels like it should be enough, so it's understandable when claimants get frustrated with the SSA when they are asked to fill out forms that ask for the same information.

Believe it or not, there is some method to the SSA's madness. To learn more, click [HERE](#).

Grateful For Our Clients:

We received this sweet email from a past client of our. It meant the world to us, and we're grateful to have been part of her journey just as we are with all of our clients.

Greetings Sara, Patrice, and All,

*I hope this finds all of you wonderful and well.
I apologize this didnt come to you prior to our great
Thanksgiving Day.*

*I do want to just take this time to let you all know what a
difference you made in my life this year and it is top on my list
in my Grateful 💎💎.*

*I hope all of you had a Wonderful Thanksgiving with family
and loved ones.*

Thank you! Thank you! Thank you!

Happy Happy Thanksgiving Season!

Linda

Alzheimer's Awareness Month:

Memories Matter

Alzheimer's disease accounts for 60-80% of all dementia. The majority of people with Alzheimer's are over the age of 65, but about 200,000 Americans under 65 are affected by early onset Alzheimer's. It is a progressive disease that gets worse over time affecting the memory, thinking, and behavior. It is the sixth leading cause of death in the United States. It currently has no cure. Research is ongoing. For a long time there was no treatment protocol. In recent years, research has discovered ways to treat the disease by not prevent or cure it. To learn more, visit [Alzheimer's Association website](#).

Team 100 Feature:

The Ollena Center for Early Childhood Assessment

Donna Ollena of The Ollena Center for Early Childhood Assessment joins our Team 100. The Centers for Disease Control and Prevention estimate that about 1 in 6 children have a developmental disability. The importance of early identification has been known to aid parents and children with specific learning needs by providing the support and learning resources to which their child can best respond. This maximizes their child's ability to learn. When it comes to developmental milestone delays, an early intervention provides more time to influence positive learning outcomes and helps the child succeed from early on.

Donna is also the author of the WONDERFULLY MADE series of books about Charlie, a four-year-old boy with autism and sensory issues. A frustrated sister seeks her mother's advice on understanding why her brother isn't like the other kids she plays with. The family's love for their wonderfully made child who is difficult to understand is a powerful and loving story that can also be a resource to introduce the concept of inclusion for all children, whether their behaviors are difficult to handle or at times inappropriate.

Happy Thanksgiving to our KLF Family! **Friendsgiving**

We celebrated Friendsgiving with our team this year. We hope that your holiday was a happy and blessed one as you gathered around the table with loved ones. Though circumstances may be tough, family and friends always remind us of what's most important.

Happy Birthday Sara Khaki! **It's Your Birthday!**

Happy birthday to our fearless leader! We wish you lots of love and celebration this year. May the next year be even more exciting than the last!

Lots of Love,
Your faithful team
